Bug: Fix Login

Date Submitted: 18/03/2019

Submitted By: Peldi

Upvotes: 1

Description:

The login page is not working properly. When I enter my email and password, it says "Invalid email or password". I have double-checked my credentials and they are correct. I have also tried logging in from different browsers and devices, but the problem persists. I have contacted support and they have not been able to resolve the issue. I am unable to access my account and I am frustrated. Please fix this issue as soon as possible.

Feature: Enable username change

Date Submitted: 18/03/2019

Submitted By: Peldi

Upvotes: 5

Description:

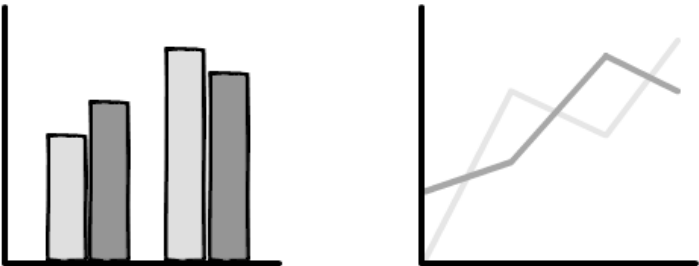

As a user, I want to be able to change my username so that I can better represent myself online. This feature would allow users to update their username at any time, provided they have a valid email address and are not currently banned. The new username must be unique and not already in use by another user. This feature would be implemented as a button in the user's profile settings, which would lead to a form where the user can enter their new username and confirm the change. The system would then update the user's profile and notify them via email that their username has been changed.

Price

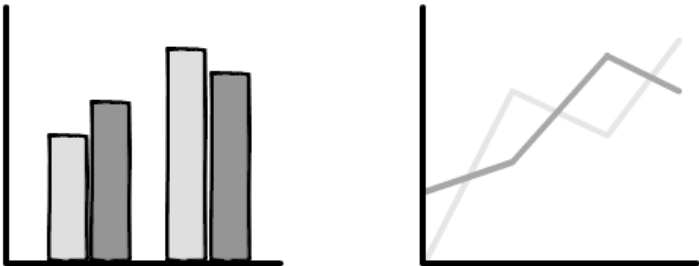

Please note that you have to pay for each feature upvote. You can pay any amount from €5 upwards, and the developers will spend 50% of their time on the highest paid features.
